SOURCE & SCOPE NOTES

- Authority: supplied PickList.xml. Product text is read from the English Description (LCID 0409), and codes are preserved as stored in each Item UPC attribute.
- Scope: visible PickList records whose code does not appear in the fruit or vegetable production booklets. These 46 records are non-produce cashier items; produce remains assigned to the produce manuals.
- The 46 records correspond to 45 distinct codes. Duplicate code 77974 is retained for Cheese Bun and Pizza Bun and is marked on both entries.
- Image filenames are references only. The referenced image assets and photographic collections were not supplied, so this is a code/label lookup—not a photo-verified identification booklet.
- Classification headings are for navigation only and do not alter source descriptions, codes, or visibility.
